

## *History*

Partners Excavating Company began as a partnership in November 1975, and became incorporated in October 1986 with Carl Berkey as president and sole owner. In June 1997, we moved to our new location on a 5-acre site just south of Harrisonburg, Virginia.

Our company offers total site preparation -- including installation of underground utilities -- and asphalt paving. Project bids range from several thousand dollars to over \$4 million and include bonding capability. We perform a mix of commercial and residential work for both general contractors and individuals.

We currently employ over 60 people, 15 of whom have been with the company ten years or more. This exceptionally stable work force and our 30 years in business have combined to establish Partners Excavating with a solid reputation in Virginia's Shenandoah Valley area for quality workmanship, reliability, and integrity.

While the majority of our work has been concentrated in the Shenandoah Valley we are currently looking at projects in Charlottesville and Albemarle County. We have also recently completed a project for Fauquier Hospital in Warrenton, VA. We would ask that you consider us for your site work needs in any of these areas.
